

Degree Programs in Comprehensive Human Sciences

Educational purpose

This course shall aim at training the researchers and faculty members who can plan/execute research based on advanced and global view in their own areas of study through rich and advance educational research from basic and applications relating to human mind and body and various activities, have a broad knowledge relating to human beings and plan/execute distinguished academic research by which advanced fusion of different areas can be sought on the back of distinguished interdisciplinary academic research and international and interdisciplinary educational research environment, and highly specialized professionals who can satisfy social needs by understanding human beings from multifaceted view and researching/designing flexible and proper aids/support.

	Competences specified by the Degree Programs	Evaluation perspectives
Master's Program	1. Research ability: Basic knowledge and ability to set research tasks and carry out a research plan in the areas of comprehensive human sciences	①If relevant research tasks from the review of previous research in the area of expertise involved in the human mind and body and various activities are set ②If modern research tasks involved in the human mind and body and various activities are pointed out from a global perspective
	2. Specialized knowledge: Advanced specialized knowledge and command of the areas of comprehensive human sciences	①If specialized knowledge to explore research subjects and fields in an appropriate manner is acquired ②If there is motivation to actively absorb and use knowledge and skills necessary to research of the relevant area
	3. Ethical view: Ethical view and ethical knowledge appropriate for persons with basic research ability or highly specialized professionals in the areas of comprehensive human sciences	①If there is a choice of appropriate methods of research for research tasks targeting humans ②If research devoting enough attention to the ethical aspect on human mind and body and various activities is carried out
Doctoral Program	1. Research ability: Ability to set leading-edge research tasks based on up-to-date specialized knowledge and carry out a research plan independently in the areas of comprehensive human sciences	①If essential research tasks that contribute to the future on the basis of previous research in the area of expertise involved in the human mind and body and various activities are set ②If original findings using reasonable methods of research in the solution of leading-edge set tasks are created
	2. Specialized knowledge: Leading-edge and advanced specialized knowledge and command of the areas of comprehensive human sciences	①If the ability to put leading-edge and advanced specialized knowledge in the relevant area into practice is acquired ②If original tasks based on up-to-date specialized knowledge in the relevant area were newly discovered
	3. Ethical view: Ethical view and ethical knowledge appropriate for researchers or highly specialized professionals in the areas of comprehensive human sciences and deep ethical knowledge about the specific area of expertise	①If knowledge to keep intellectual property and information involved in research secure is sufficient ②If knowledge to keep ethical view, intellectual property and information vital to the relevant area secure is explained
